

Services to the wet waste industry

Company background...

Dexter Watson Limited was formed in early 2012, bringing together a team with specialised backgrounds in engineering and waste handling with the aim of designing and manufacturing innovative equipment to provide effective solutions and services to the wet waste industry.

One solution was to develop a dual purpose mobile coarse screening container which could remove rags and debris from sewage along with oily wastes and double up as a mobile oil interceptor.

The Dexter Watson Coarse screening container

- 30 m³ capacity
- Removes rags and debris from sewage
- Separates interceptor waste
- Separates gully and road sweeping waste
- Doubles as a mobile oil interceptor

- Features
 - The collapsible ladder and safety rails
 - Hydraulic operated rear door
 - Rear door stay and closure aid
 - 6" inlet
 - 4" stack pipe outlet
 - 4" lockable gate valve
 - Screening grids manufactured to the customer's specifications
